

## Our Stein-Bloch Frock

On this high bred coat are lavished the best efforts of the Stein-Bloch master-tailors, for, being unrelieved by pattern or line, it depends for its quality on pure workmanship. Graceful and patrician, it will give a senator dignity in debate, or a bridegroom confidence before the altar. Made from the finest and softest worsteds and vicunas, especially woven and imported for it. Its price is surprisingly moderate, and should be carefully noted by those who have studied the cost question on merchant tailor quotations.

## TERSELY TOLD.

Fred Winkler is in the city from New Orleans to spend a few days with friends.

Chas. Cottrell and family are expected home from Cloverport, Ky., next Tuesday.

Mr. and Mrs. Wm. R. Johnson and children returned to Pensacola after an absence of several weeks.

Morris Levy, who has been spending several weeks in Atlanta, returned to the city yesterday afternoon.

Mrs. Gus Goldbach and son, Cliff, are spending a few days with relatives at the Manhattan hotel.

L. S. Brown left yesterday at noon for Atlanta, where he will spend a few days on business.

W. J. Kiduff, the well known secretary of the Gulf Coast Lumbermen's Association, arrived in the city last night from Mobile.

Miss Elise Chipley and Miss Belle Whiting left yesterday for New York, where they will spend some weeks visiting friends.

Mrs. Herr and Mrs. Dorce, relatives of Mrs. R. K. White, are expected to reach Pensacola within a few days on a visit to Mrs. White.

Hon. W. B. Shepard, who has been absent from the city for a number of months, has returned home and is being greeted by his many friends.

Miss Lucille Powers, who has been spending several weeks in Pensacola the guest of her sister and friends, has returned to her home in Biloxi.

Mrs. R. Hutchinson has returned from a visit of some weeks to relatives and friends in Blounts, Ala., and is again at her home on Gregory street.

Rev. J. R. Bicknell will leave today for Washington, where he will remain for about a week, then returning to Pensacola where he will make his future home.

The Ladies Benevolent Society of Temple Beth-El will hold an important meeting at the Temple Thursday afternoon at 4 o'clock. As this is the first meeting to be held in several months all members are requested to be present.

Every family who has a spare room should make an effort to rent it out this winter. Tourists, last winter, complained a great deal of difficulty in securing board or rooms. There may be even more tourists in Pensacola this winter than ever, in fact, some of them have already reached here and

## FIRST FOOTBALL GAME OF THE SEASON

Will Be Played Thursday Between Teams Representing Forts Barrancas and Morgan.

The first football game of the season, so far as this section is concerned, is to be played Thursday afternoon between the army teams representing Fort Barrancas and Fort Morgan.

The game is to be played on the Barrancas gridiron, and as both teams are exceptionally strong ones, it is expected to be an interesting contest, and one which will be well worth seeing.

The eleven from Fort Morgan will come to Pensacola on the army steamer Poe, arriving early Thursday morning, and will be in good shape for the contest of the afternoon.

Barrancas has one of the strongest elevens to represent the post in many years. The team is a heavy one, being composed of the following players: Williams, F. B.; Dusenkeski, L. H. B.; Brown, R.; Biegler, Q. B.; Ott, C.; Giblin, R. G.; McCoy, R. T.; Biserstaff, R. E.; Unger, L. G.; Dillon, L. T.; Holton, L. E.

Best Liniment on Earth.

Henry D. Baldwin, Supt. City Water Works, Shullsburg, Wis., writes:

"I have tried many kinds of liniment, but I have never received much benefit until I used Ballard's Snow Liniment for rheumatism and pains. I think it the best liniment on earth."

25c, 50c and \$1.00. Sold by all druggists.

**DR. KENNEDY.**

Dr. Mallory Kennedy has established his office over D'Alemberte's drug store. His office hours are from 9:30 a. m. to 6 p. m. Phone 274 and 109. nov21-1w\*

**Misappropriated State Funds.**

Crockett, Texas, Nov. 21.—A. S. Busby, former assistant financial agent of the State of Texas, has been found guilty of misappropriating state funds and given a term of three years in the penitentiary.

"Cure the cough and save the life."

Dr. Wood's Norway Pine Syrup cures coughs and colds, down to the very verge of consumption.

are looking for rooms. Parties who care to rent rooms should insert a little want ad. In The Journal—this will do the work. Special terms by the month.

The remains of William Christie, who was one of the oldest of the city employees, were interred yesterday morning, the funeral services being conducted from the home in the western portion of the city. The body was placed at rest in St. John's cemetery.

Mr. and Mrs. M. H. Judd have returned from Illinois where they spent the summer and autumn. They were in the wreck which occurred just north of Montgomery a few days ago and their car was derailed and thrown over on its side, but luckily they escaped injury.

S. D. Conway, a well known traveling man who makes Pensacola about every three months, is in the city on one of his regular visits. Mr. Conway says that he never saw prospects brighter than they are in the south at this time. The fever seems to have had no effect on business and, in fact, he says his business now is heavier than it has ever been before.

Mr. Conway thinks Pensacola has a great future. It has long been one of his best towns and it continues to get better every time he comes here.

You are missing something when you use cheap artificial extracts. Blue Ribbon Lemon and Vanilla are made from the fruit and give desert the dairy, natural fruit flavor. "Takes less. Flavors perfectly."

**Dr. Dawson is one of the most expert chemists in the country, and is a veterinarian of note. **TRYING TO KILL WATER HYACINTHS**

**EXPERIMENTS ON ST. JOHN'S RIVER UNDER DR. DAWSON ARE PROGRESSING RAPIDLY.**

Experiments looking toward the destruction of the water hyacinths are progressing rapidly under the direction of Dr. Charles E. Dawson, veterinarian of the State Board of Health, and expert chemist, who is now with the steamer La Reve, in the upper St. Johns, says the Jacksonville Times-Union. The work is being conducted under the supervision of the United States engineers, and reports are made by Dr. Dawson to the Jacksonville office regularly.

Under the conditions on which the appropriation for ridding the waters of the country of these obstructions to navigation was made, no chemical can be used which is poisonous to cattle, and for this reason the work must be done very carefully. It is not likely that the final report on the results of the experiments can be made up in less than six weeks or two months, but when it is, it will be complete in every detail, and it is hoped that the problem will be satisfactorily solved for all time.

The old spray used for destruction of the hyacinths did its work well, as far as the destroying of the plants was concerned, but several of the cattle owners made complaint that their stock, feeding on the treated plants, was injured, and that several of the cows died as a result of the poisonous chemicals used in the spray. This necessitated a change in the means of warfare, and Dr. Dawson was instructed to devise a safer means of doing the work.

**Trying New Chemicals.**

On the La Reve the experimenting party has all the chemicals which there is any likelihood of needing during the course of experiments, and a small laboratory has been fitted out for the chemicals. A further test of the old spray is to be made, and at the same time several new combinations devised by Dr. Dawson and his assistants will be tried. Just what these are cannot be learned as yet, as it is desired to make absolutely certain of the means to be used before an official report is made for publication.

For the purpose of making the test the more complete, cattle are being herded near the points where the boat is at work, and the plants that have been treated with the new compounds fed to the animals. The results are then carefully watched, and a full report made of the effects on the cattle. If a chemical can be found which will be deadly to the hyacinths, and yet harmless to cattle feeding upon the plants, the problem will be solved, and the work of ridding the rivers and smaller navigable streams of these obstructions will then be pushed forward rapidly.

## MOBILE AND PENSACOLA UNDER WAY

(Continued From First Page.)

new and reconstructed track will be of 85 lb. standard steel rail, 30 feet in length and properly bonded. Sidings, log lines, turnouts and temporary sublines will be of 56 lb. and 60 lb. steel.

"Ties will of long leaf pine or black cypress, 6x8x8, spaced two feet from center to center, or 2x4 to the mile. All piling will be of black cypress or yellow pine and all wood culverts of wood trestles will be of long leaf pine. Bridges will be of steel girder, except the three draw or rolling lift bridges.

"These three especially built bridges will be of the most approved material and the soft over the entire line is of such character that very little ballast will be necessary for a first-class road bed."

The total estimated cost of construction of the west division has been set at \$3,930,200 and the operating expenses estimated at \$201,110.

The survey for the Mobile, Gulf & Atlantic, as it is known, and the drawing of profile were completed more than a year ago. Several leading financial men of the north, men who have worked at the building of new roads in other sections, have gone over the ground and each has expressed the opinion that no finer territory could be found for the opening of such a road than this. Most of it passes through a virgin forest and competent lumber men who have taken over the land say there is timber sufficient to last for more than fifty years of constant cutting. Besides this, the land is fertile and well adapted for general agriculture. No better stock country than the lower edge of the Pine Ridge can be found in this part of the country.

**An Immense Territory.**

This road will make the trip from Mobile to Pensacola in one and a half hours, the distance being sixty miles. Not only will it place Mobile in more direct connection with Pensacola, but it will open up an immense territory to Mobile trade. This territory, of course, will be opened in the same way for the merchants of Pensacola, and for the merchants of the eastern terminus. There will be three ports, this alone being a vast advantage for the road and one that will tend largely to its success as a money maker. From these ports may be exported vast quantities of timber and cotton which are now carried to the Gulf by the coastwise trade.

At the same time, the road will give an outlet to the east and north for trade either way. Six lines make these immediate connections, these yield in turn many connections which they make with other roads. At Mobile the road may connect with pack trails going up the two rivers and at three points connections may be made with ocean going vessels to all parts of the world. Few roads at present have such enormous advantages as this.

Baldwin county is a rich country, one which will develop rapidly upon the entrance of this road. The road will pass through the county running in a generally southerly course to Pensacola, or a branch division from the main line running into Pensacola. When the main line reaches the eastern shore a branch line will run south along the shore to Point Clear. This has no relation to the Bay Minette and Fort Morgan, but it is a separate and distinct main line will cross the Bay Minette and Fort Morgan, necessarily in Baldwin county. The country beyond Baldwin through which the road shall pass is as rich and as needful of development as is Baldwin itself. This country, as has been stated, is a fertile one and will be a rich territory for development.
